SWEDISH DESIGN

PRODUCTION

All our products are handmade by carefully selected craftsmen. The materials are solid brass, copper, stainless steel and aluminium with both polished and brushed surface. Brass and copper will oxidise and age with grace unless you do not polish them now and then. For this we have a great polish for sale. The products in chrome and black chrome are plated brass, and the black aluminium has a durable anodised coating. Stainless steel is always stylish and the polished stainless steel is a great complement to chrome.

Fia Berglund and Malin Bäckman are the designers behind the collection.

ABOUT US

Bäckman & Berglund Sweden is a high-end hardware brand focused on knobs, hooks, handles, door handles and wall hangers. The company was founded in 2008 and currently sells fittings to companies worldwide. We combine genuine craftsmanship with innovative design in classic materials. Our love for metals, the passion for design and an ambition to give each product a high quality finish and exclusive feel, makes our collections unique. For us it is important to design modern but timeless products in high quality and solid materials that is durable. Our products should be an investment that you can enjoy and love for years.

PUTS

PUTS cleaner works on most metal surfaces like; stainless steel, chrome, copper, brass, aluminium, silver and gold. The ingredience are kind to the environment and do not make marks and scratches on the surface.

How to use:

Shake the bottle well. Put a few drops of PUTS on a damp sponge/cloth. Clean the product. Be careful with surrounding materials because the cleaner can leave white stains. Rinse carefully under water or wipe off with clean damp sponge/cloth. Wipe dry from all excess cleaner and water.
